Important information

Risk factors you should consider before investing:

- The value of shares and the income from them can go down as well as up and you may get back less than the amount invested.
- Past performance is not a guide to the future.
- Although the Fund invests in UK financial sector cash deposits and related instruments, which are less volatile than shares or bonds, its investments are still subject to the risk of default on the part of the institutions with which it invests. In the event of a default, the Fund will make a loss.
- Derivatives may be used to hedge against various risks as permitted by the regulations but may not be used for speculative purposes. The use of derivatives for hedging in a rising market may restrict potential gains.
- The annual management charge for the Fund will be charged to the Fund's income account. If insufficient income is generated by the Fund to cover the annual management charge, the balance will be deducted from the Fund's capital and, to that extent, will constrain capital growth.
